

Expanding Knowledge: Spring 2021 Intern Profiles

MALACHI EKEL

TRIBAL PROFESSIONAL DEVELOPMENT INTERNSHIP
PROGRAM 18+ INTERNSHIP PROGRAM

Why did you choose to join the Tribal Professional Development - Internship Program?

I chose to join the internship program because it was something I realized I should take advantage of. As a college student who is interested in business I saw it as an opportunity to see how a part of a business that I have never seen before works. I think that it was an amazing opportunity as I believe it will help me if I ever become part of the Business Committee to see these different departments at work.

What department did you choose to intern with? And why?

I chose to intern with Tribal Brand Marketing because it stood out to me as a department that worked with a number of other departments within the Tribe. It also seemed interesting as I was told about the documentary and magazine that the department was currently working to create.

What is one or two valuable things you have learned in your internship?

One thing that I have learned during this internship is that everything that the Tribe does has an incredible amount of planning behind it. As a Tribal Citizen I am more accustomed to seeing the results of this planning rather than the process that created the result. After being a part of Tribal Brand Marketing I was able to see just how much work goes into certain things and it has really given me a new appreciation for things that I considered easy or simple.

Why should the Tribal Community participate in the Tribal Internship Program?

I think that the Tribal Community should be more open to participating in the Tribal Internship Program because it is an incredible opportunity to be able to learn from people that work in a certain department. There also are many different internship options available. There is truly something for everyone.
